## ABOUT US...

We are happy for introduce our selves about our company.

Al Mubthadaeen Trading & Contracting W.L.L (MTC) is a local company operating in the Qatarsince 2015. MTC Has prided itself on an impressive record of successfully completed Civil, Electrical & Interior Fit - Out projects, and has enjoyed the reputation of meeting its schedules and doing so within budget and to the highest client satisfaction. We consistently place our emphasis on health, safety and the environment. Stringent procedures are enforced at every step of every job as we continue our drive to improve performance and exceed client expectation.

We are proud to report that more work comes from our existing clients. We are a professional construction organization dedicated to serving our clients with honesty and integrity.

We understand our customer needs and work closely with architects and engineer on project senables the project to flow smoothly and rapidly, thus meeting construction schedules and controlling construction.

As we respond the ever – changing demands of the construction industry, MTC looks forward to a continued growth and success for many years ahead

## Vision & Mission...

Al Mubthadieen Trading & Contracting W.L.L vision is to maintain its growth as one of the leading contracting companies in the State of Qatar that delivers unique projects for exceptional clients and this in line with "Qatar National Vision 2030". In that regard, Ramaco is committed to deliver high-end quality for landmark and distinguished projects.

Our mission is to deliver high-quality, cost effective projects on schedule by employing and supporting motivated, flexible, and focused teams and provide our employees with an honest and helpful working environment, where every employee individually and collectively, can dedicate themselves to providing our clients with exceptional workmanship, extraordinary service, and professional integrity. The key to our success is our ability to satisfy our client's needs and requirement

▪ through:

- Teamwork
- Professionalism
- Adaptability
- A reservoir of expertise and experience
- Continual growth and development
- Total Quality Management

## Divisions...

### Construction Divstion

#### Design & Project Development

Our Architects & Engineers provide leading-edge services for the Residential, Commercial, Institutional and other sectors, and develop tailored solutions for the increasingly complex requirements of today's projects.

We create designs that meet the diverse needs of our Customers and their end users, including finding innovative ways to make our Clients' Projects more environmentally friendly. Our ability to optimize the operations of a wide variety of facilities allows us to deliver long-term savings to our clients while creating sustainable projects.

Areas of expertise:

- Conceptual Designs
- Preliminary and detailed Designs
- Plans and Specifications
- Tendering Documents

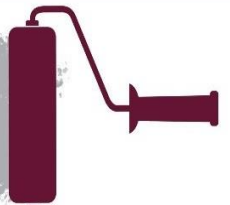

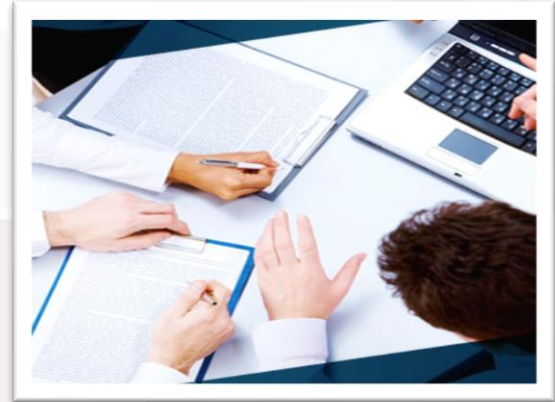

## Business Development & Estimation

Business development is the creation of long-term value for an organization from customers, markets, and relationships. Our team's task is all about figuring out how the interactions of those forces combine together to create opportunities for growth.

Accurate estimating begins with the understanding that every aspect of a Project has a cost associated with it. That's why our Estimation process involves listening to our Clients, to understand their project goals, predicting costs by understanding market conditions, using supplier and subcontractor relationships for pricing and constructability, capturing cost history and communicating this information in a timely and meaningful way to the project team.

Our services include:

- Opportunity studies
- Pre-feasibility and feasibility studies
- Surveys and technical studies
- Cost Estimation

## Operations (Civil, Electrical, Mechanical & Construction Support)

As the builder of lots of iconic Projects in Qatar, Ramaco transforms Design concepts into tangible assets through a comprehensive approach to construction that is informed by our diverse technical expertise.

We deploy industry-leading technologies, lean construction methodologies, and innovative jobsite safety approaches to yield optimal results. We serve as trusted partners to our valuable Clients (owners, developers, etc...), helping them successfully complete their most complex assignments.

Our specialized teams of Project Managers, field superintendents and technical specialists in Civil, MEP and Construction Support Systems, deliver a wide range of project types in diverse settings.

From luxury residential compounds, school and institutions to commercial and residential towers, Ramaco builds, expands and modernizes nearly every building type thus truly building a better country.

Our Operations Services comprise:

- Project Management
- Owner's Representation
- Construction of Civil, Electrical and Mechanical works
- Manufacturing / Installation of doors, windows, cabinets and furniture
- Start-up & Commissioning

## Projects Controls

Project Controls encompass the people, processes and tools used to plan, manage and mitigate cost, schedule and QHSE issues and any risk events that may impact a project.

We gather cost and time data, use management and analytical processes to predict, understand and constructively influence the time and cost outcomes of projects to assist in effective management and decision making.

We further establish Quality and HSE plans and make sure they are implemented in Projects by daily monitoring and follow ups to ensure that we execute what we plan for.

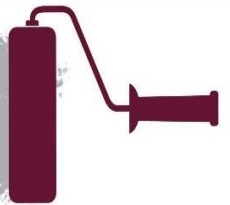

## Interior Fit Divstion

Can count on us to deliver turnkey solutions in the areas of interior design, engineering, planning and execution, to make sure our clients get exactly what they need.

The entire project is overseen by a project management team and the procedures are carried out in accordance to ISO 9001:2008 quality management standards.

## Electrical Division

We at MTC work with best know how and methods while following the latest QCS and kahramaa standards. We have dedicated teams to study, evaluate and executive all kinds of electrical works. With the supervision of our in-house electrical engineers,our experienced technicians will carry out the dedicated scope of work.

We have a wide network of suppliers who can source any electrical equipment/ material from any part of the GCC region. Our Health and safety policies are an important factor in our day to day operations.

## Quality...

### Quality Management

MTC Quality Management System, which complies with the requirement of the ISO 9001 standards, is for all staff baseline to which they must adhere and from which they are encouraged to seek opportunities for continuous improvement. Quality is not to be compromised and MTC management supports and encourages all team efforts to achieve and maintain the highest levels of customer/ client satisfaction.

## Quality Objectives and Scope

MTC has developed a Quality Management System that aims to better satisfy the needs of its customers and improve its own management process. The scope of the Quality Management System includes all Civil, Infrastructure, Highways and Electromechanical contracting services.

Quality management embraces organization, responsibilities and authorities, work methods and resources.

The system was implemented with a view to achieve and maintain a quality of service that is commensurate with MTC 's quality objectives and with customer expectations

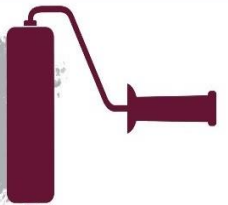

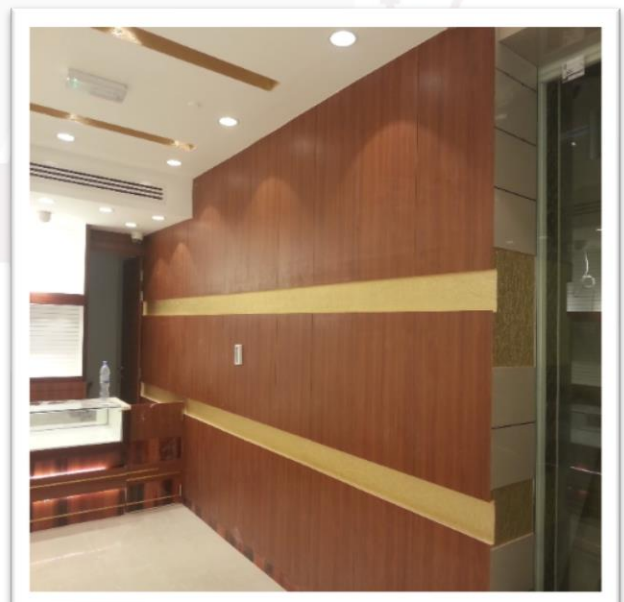

## Health & Safety Environment

mtc is committed to continual improvement in the standards of hse in all operation and activities,including those of its client's sub –contractors and suppliers.The company has achieved this objective by establishing its own hse mnagment system,policiesand procedures and by Identifying reasonable, Obtainable and Measurable Hse objectives and ensuringthat all employees are aware of mtc 's commitment to these objectives. Developing an hse program/plan that identifies who are responsible for delivering the hseobjectives.

implementing and improving safe working practices and methods, conducting periodic audits and management reviews, encouraging employee's participation and effective communication and pursuing careful selection and training of personnel at all levels to ensure that they instructor carry out work in a safe manner. Recording, monitoring and analyzing recurrence and eliminate or control all hazards. Monitoring the use of hazardous materials and their use where possible, utilizing safer alternatives so as to ensure the minimum impact on people and the environment.Complying with the Qatar laws and legislation, codes of practice and the hse international standards. Cooperating with clients to achieve performance improvements throughout all of the company'sactivities.it is also worth mentioning that mtc has been continuously recognized by its clients for high safety standards and has obtained many awards for excellent performance.
